EDUCATION

The University Of Sheffield

Sep. 2023 – Present

Computer Science MComp - Achieving a 2:1 overall at this stage

EXPERIENCE

Research Software Engineering Intern - N8 CIR Winter Internship

Nov. 2025 – Apr. 2026

- Worked for a university researcher to develop and improve a machine learning and data analysis tool to segment classify and analyse cells
- Worked in Python with a supervisor with experience in the project
- Using agile development practices such as Kanban boards and frequent meetings
- Worked with the university supercomputer to train a new model

RELEVANT UNIVERSITY MODULES

- Introduction to Software Engineering - 80%
- Devices and Networks - 90%
- Algorithms and Data Structures 75%
- Logic in Computer Science - 73%
- Software Hut - 87%
- Dissertation Project - 65%
- Web and Internet Technology - 65%

RELEVANT PROJECTS

Rails University Group Project | Ruby, Rails, Git, Slack, PostgreSQL

Jan. 2025 - May. 2025

- Developed a Rails web app with an external client to fit their needs, which is now deployed and in use
- Worked in a team of 7, independently organising meetings for requirements engineering and implementation
- Used agile development principles, such as user stories and Kanban boards
- Ran weekly meetings with the client to refine the requirements
- Focused on back-end, especially database design and implementation, and handled client communication, effectively communicating with a non technical client

Global Engineering Challenge

Jan. 2024

- Worked in multidisciplinary team to design a solution to a transport problem in rural Cambodia
- Adapted to work collaboratively in person and online
- Developed leadership skills by allocating tasks and organising team activity
- Improved time management and organisational skills to collectively meet deadlines on a time sensitive project
- Developed presentation skills by presenting our solution to an expert panel

Dissertation Project | Kotlin, Jetpack Compose, Vico, Git

Sep. 2024 - Dec. 2024

- Developed a eating diary mobile app for users with disordered eating, developed in Kotlin with Jetpack Compose
- Managed the project timeline and requirements as well as developing the app
- Independently ran user requirements and user evaluation surveys
- Organised meetings with supervisor to manage progress updates and incorporate feedback

TECHNICAL SKILLS

Languages: Java, Python, SQL (SQLite, MySQL, Postgres), JavaScript, HTML/CSS, Ruby, Bash, Kotlin, Lua, Haskell

Frameworks: Ruby on Rails, SpringBoot, Sinatra

Libraries: RSpec, Pandas, Numpy, Tensorflow, Matplotlib, JUnit, Tkinter

Linux: Extensive personal and work use
